PROJECT MANAGEMENT

LOCATION: St. Paul, Minnesota

A stunning two-story glass stair tower is the highlight of this high school renovation. Besides filling in the second story (which previously didn't continue over the roof) on this 28,586 sq. ft. brick structure, Lee Companies managed the updating of the lighting, flooring, plumbing and HVAC controls. The second story addition added classrooms (bringing the total up to 12), a seminar room and modernized the natural science lab.
